

Sabrina May

Product Design | HCI and Behavioral Research | Complex Systems at Scale

📍 Ann Arbor, MI | 📞 732-690-1331 | ✉️ maysab@umich.edu | 🌐 sabrinasmay.com | 🌐 LinkedIn

EDUCATION

University of Michigan, Ann Arbor, MI; M.S. in Human Computer Interaction (MSI)
Master's Thesis Option Program (MTOP), Selected Scholar

Expected Graduation: December 2026

↳ Leading thesis research on trust, privacy, and behavioral decision-making in AI-driven systems (FEMTECH)

Relevant Coursework: Interaction Design · Visual Design · Typography · Web Design · Accessibility · Motion Design · AR and VR · Digital Fabrication · Consumer Behavior

WORK EXPERIENCE

Center for Democracy & Technology

September 2026 - Present

Technology Policy Human Computer Interaction Extern

- Own the end-to-end survey analysis workstream for a mixed-methods study of how neurodivergent children use AI chat agents, structuring a 3-stage comparison to reveal how trust, use patterns, and decision-making change over time.
- Synthesize survey data with 350 diary entries and 19 interviews into participant case studies and cross-user themes, translating longitudinal evidence into opportunities for safer, more inclusive AI products and policy guidance.
- Developing evidence-based UX and policy recommendations that inform legislative advocacy and consultations with leading technology companies, connecting children's lived experiences to safer, more accessible AI product design.

ReferU.AI (Legal Tech Startup)

June 2025 – August 2026

UX Designer & Founding UX Researcher

- Designed end-to-end user flows, wireframes, and high-fidelity Figma prototypes for an AI attorney-matching platform, translating complex decision logic into understandable experiences across mobile and desktop.
- Built and maintained a reusable design system spanning components, typography, color, and interaction patterns, improving consistency across core journeys and accelerating design-to-engineering handoffs.
- Conducted usability testing and card sorting, then redesigned navigation and information architecture to improve content findability by 25% and strengthen confidence in AI-assisted recommendations.

Epic Systems

January 2023 - September 2023

PM for Anatomical Digital Pathology (promoted specialty: End User Devices)

- Promoted to End User Device specialist during my first month and assumed ownership of software and hardware workflows across 20,000+ clinical devices and approximately 1,000 departments.
- Conducted contextual inquiry with 300+ clinicians to identify cognitive load, errors, and accessibility barriers across pathology dashboards, scanners, printers, and specimen-tracking workflows.
- Translated workflow failures into interaction requirements and device configurations, collaborating with designers, developers, and analysts to improve quality and consistency across regulated clinical environments.
- Validated design changes through usability testing and adoption data, using diagnostic turnaround time to assess whether new workflows improved clinical performance.

Critical Response Group

March 2022 – June 2022

Product Design Intern

- Designed decision-support interfaces for first responders by translating field research on time pressure, cognitive load, and information gaps into task flows, wireframes, and production-ready interaction patterns.
- Created high-fidelity prototypes and visual specifications in Figma and Adobe Creative Cloud, giving engineering clear interaction states and implementation guidance for safety-critical workflows.
- Validated designs with state and law-enforcement stakeholders, contributing to emergency-response products that supported \$1M+ in contracts while meeting operational and safety constraints.

METHODS & TOOLS

Design: Interaction Design · UX and UI Design · Design Systems · Responsive Design · Accessibility · Information Architecture · Visual Design · Typography · Motion and Spatial Design

Research: Usability Testing · Contextual Inquiry · User Interviews · Card Sorting · Journey Mapping · Task Analysis · Heuristic Evaluation · Behavioral Analysis

Tools: Figma · Adobe Creative Cloud · Axure · Miro · Dovetail · HTML · CSS · JavaScript · Qualtrics · Tableau · Arduino · Agile
